

I oppose the NAB petition 04-160 that seeks to stop XM instant traffic and weather. These are specific channels devoted only to traffic and the weather, commercial free.

Alot of times the weather is bad and you need to know the weather right then. With regular broadcast channels you have to wait for commericals and music to get over in order to hear what the weather is or how the traffic issues are.

I am a current customer of XM Radio and paying for the service is worth every penny. If I am paying for it why shouldn't I have the weather and the traffic too.
